Our Appeal

for

1920

A fair start in life should be the heritage of every Ontario child, but many hundreds, sick and crippled, are doomed to eke out drab, ineffectual lives, burdens to themselves and the community alike.

Happily the Hospital for Sick Children exists to remove the handicaps of disablement and disease from stricken children.

War conditions have left this great institution heavily in debt—its revenue unequal to meet the ever-increasing demands made upon its services from all parts of the province.

An unfailing income of 50 cents a minute is needed! Will you not send to the Secretary some token of your sympathy for this charity?

Please use the form on the back cover.

1875

FIRST HOSPITAL ON
AVENUE ST., TORONTO

On December 19th. 1874, the first donation of \$20 was received towards the founding of a Hospital for Sick Children in Toronto. One nurse and six little cots were established in a rented house at No. 31 Avenue street. The first little patient cared for was Maggie, aged three years, who was badly scalded while her mother was absent earning bread for the family.

Through the life work of the late John Ross Robertson, from this humble beginning there has been completed the most perfectly equipped children's hospital on this continent. Since 1875 almost half a million children have been cared for through this charity.

1920

THE MAIN BUILDING, COLLEGE
ST., TORONTO

Here to-day, under methods unsurpassed, skilled doctors and nurses can successfully carry on the healing work for suffering children.

Here 250 cots are always filled, and a staff of 115 nurses was required during 1919 to care for the 41,762 children admitted. The total number of in-patients is made up of 4,305 from Toronto and 760 from other parts of the province; cured, 3,297; improved, 889; unimproved, 204; died, 465. Total out-patients, 38,697, of which 31,450 were cured and 5,247 improved. The religion of the 5,065 in-patients—3,657 Protestants, 783 Roman Catholics, and 625 other religions.

Please send your gift to the Secretary-Treasurer, The Hospital for Sick Children, 67 College Street, Toronto.

.The Out-Patient Wing

Through this large extension the Hospital is being more closely linked in with the Public Health work in the homes of the poor of the city and Province. Yearly additions to the departments devoted to Infants' Wards, Medical Dispensary, Daily Clinics, and Orthopedic Work, mean increased expenditure.

During the past year 36,697 children were treated in the Out-Patients Department. Of these, 15,496 were girls and 21,201 boys. The largest number in any one day was 268, and the daily average 110. The charge to the parent or municipality is merely nominal; the difference must be made up through the generosity of the public.

SUMMARY OF TREATMENTS

Medical	9764	Eye	3675
Surgical	9550	Tubercular . . .	1417
Orthopedic . . .	1019	Massage	789

Coming in for Treatment

Fathers and mothers, fighting against the daily sickness of their little ones, find an ever open door to the Out-Patients' Wing and take their turn with the doctor. Examinations are made, surgical operations performed, medical advice given, and during the past year the Dispensary filled 33,221 prescriptions, besides daily orders for solutions.

The total number of surgical operations performed in 1919 upon out-patients was 2,249, also many minor operations not tabulated.

GIVING OUT MEDICINE

Please send your gift to the Secretary-Treasurer, The Hospital for Sick Children, 67 College Street, Toronto.

Making Appliances

For cases of curvature of the spine, infantile paralysis, club-feet, bow-legs, knock-knees and other deformities, Orthopedic surgery requires extensive mechanical shops to turn out the appliances, braces, splints and shoes, used in the treatment of such cases.

The X-Ray Department

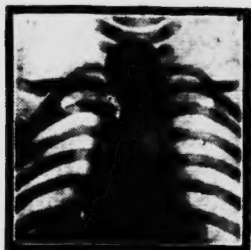

This important department has been enlarged, and all Out-Patient work is taken care of separately, from the doctors' private patients. The records for 1919 show the great usefulness of radiographs, also of X-Ray treatments for different diseases, and examinations for fractures.

To Maintain the Health of the Children

When a patient is on the road to recovery there must be continued co-operation between the Hospital and the home.

Failure at either end nullifies the work of the other and wastes the money of both.

Homes Should

Keep the children clean.

Insist upon sufficient sleep.

Provide proper nourishment.

Clothe the children properly.

Remember that happiness and good morals contribute to health.

Instruction to Mothers

Qualified Nurses in the Hospital give advice on dietetics, invalid cookery and baby feedings. The Toronto Board of Education maintains a teacher at the Hospital so that the little ones may go on with their lessons.

The Infants' Department

IN A CUBICLE

WEIGHING BABY

In these wards the baby receives a "right start." The department is divided into numerous glass partitioned cubicles, so that the babies may not be crowded, and may receive the constant and individual attention so necessary in their successful management.

Here one may see babies exhibiting all the various problems of infant feeding.

Years ago the majority of "difficult feeding cases" died; to-day the greater majority lives. The obstacles to the successful treatment of these babies in the poorer homes are practically insurmountable. This department, equipped in the best way that modern science and tender interest can devise in saving the babies, is converting an economic loss into a national asset.

In spite of the relatively greater cost of maintenance, this department must be kept going to give these fascinating little tots what is theirs to demand—"a right start in life."

From the Pasteurization Plant the Daily Output of Germless Milk and Baby Feedings Was 110 Gallons During 1919.

Please send your gift to the Secretary-Treasurer, The Hospital for Sick Children, 67 College Street, Toronto.

MOTHER'S VISIT

COMFORTABLE

How to Apply for Admission

Parents who are unable to contribute to the maintenance of their children in the Hospital should apply to the Clerk, Reeve or Mayor of the municipality where they have been living for three months or more. Application forms will be supplied on request.

In issuing such orders, the municipality undertakes to contribute \$1.25 for each day of the child's stay in the Hospital. This arrangement is made under the authority of Provincial Statute. See Section 31, Paragraph 3, of the Official Regulations for the Government of Public and Private Hospitals.
